

1. What is an **.als** file?
2. What is an **.alc** file?
3. Where do you record a **midi clip**?
4. What is **key/midi mapping**? Multimapping?
5. How do you **extract a groove** from a drum loop?
6. How do you apply this groove to another drum loop?
7. What is **warping**?
8. What happens, if warping is enabled in an audio file's clip view, the warp mode is set to beats and the file tempo is the same as the song tempo?
9. Where can you find the **clip view**?
10. What is the shortcut to see the **clip view**?
11. The shortcut for switching from **clip view** to **device view**?
12. What is a **device activator**?
13. The shortcut for creating a **return track**?
14. How many **return tracks** can you create?
15. What is a **scene**?
16. Where do you activate the function, which allows you to play Midi notes in LIVE with the keyboard of your computer?
17. What is the **back to arrangement** knob?
18. How do you **zoom into** an audio or midi file horizontal in arrangement view?
19. How do you write a **track-volume envelope** in **draw mode**?
20. What is the short cut for the **draw mode**?
21. How do you adjust the **grid** for an audio track in arrangement view?
22. What is the **time ruler**? (arrangement view)
23. What is **global quantisation**?
24. How do you change from **session view** to **arrangement view**?
25. What means to **consolidate audio clips**?
26. What is the shortcut for **splitting** an audio clip?
27. What is the shortcut for **consolidating** audio clips?
28. What is the shortcut for **splitting** a Midi clip?
29. What is the shortcut for **consolidating** Midi clips?
30. What means **capture and insert scene**?
31. What is the shortcut for **setting global quantisation to one bar**?
32. What is the shortcut for **setting global quantisation to none**?
33. What is **zoom display** and where do you adjust it? (session view? arrangement view? preferences?)
34. Where do you select the **control surface** (midi controller), which shall be used in your Live sets?
35. Where can you select the **take over mode** and what is it?
36. How do you select a Live set to be your **default set**?
37. Where do you select your **default warp mode**?
38. What means **default**?
39. Explain the warp modes **beat, tones, texture, re-pitch, complex, complex Pro**.
40. Explain the launch **modes trigger, gate, toggle, repeat**.
41. Where do you select your **default launch modes**?
42. What means **multi mapping**?
43. Explain shortly, what a **low pass, high pass, band pass and notch filter** does.
44. What is a **macro controller** in LIVE and where do you find it?
45. How do you set a **bookmark** in the Library's file browsers?
46. What does the **interval knob** in beat repeater control?
47. What is **resampling** and how do you do it in LIVE?
48. What is the **Operator? Analog? Drum Rack? Impulse? Sampler/Simpler?**
49. What does the Midi effect **arpeggiator**?
50. What is the difference between **SAMPLER** and **SIMPLER**?
51. How do you **slice** an audio file **to a new midi track**?
52. How do you **play** it on the keyboard?
53. How do you create an audio file out of a midi file? (several ways)
54. What is the newest version of LIVE 8?
